We claim:

- 1. A convertible roof movable into a closed position and lowerable into a lowered position in a rear stowage space, comprising:
 - a rear roof part;
 - a shelf movably supported relative to the rear roof part;
- an adjustment means for adjusting the shelf between an operating position with the roof closed and a lowered position in which the shelf is positioned against an inside of the rear roof part positioned in the rear stowage space.
- 2. The convertible roof of claim 1, wherein the shelf can be swiveled around a swiveling axis located in an area of a rear edge of the shelf.
- 3. The convertible roof of claim 1, wherein the shelf is pivotally connected to the rear roof part in an area of a rear edge of the shelf.
- 4. The convertible roof of claim 2, wherein the shelf swivels into the rear roof part when the roof is being lowered.
- 5. The convertible roof of claim 1, wherein the shelf has two opposing outer side areas which can be swiveled relative to a middle part of the shelf.
- 6. The convertible roof of claim 1, wherein the shelf, in the closed position of the roof, is pretensioned down into an operating position.
- 7. The convertible roof of claim 1, further including a control lever in contact with a bottom of the shelf to move the shelf against the rear roof part when the roof is being lowered.
- 8. The convertible roof of claim 7, wherein the control lever is attached to a bearing mechanism of the roof.

- 9. The convertible roof of claim 7, wherein an elongated engagement surface is formed on the bottom of the shelf for control engagement by the control lever.
- 10. The convertible roof of claim 5, further including a pressure pad positioned laterally on the rear roof part to keep a respective side area of the swiveled shelf swiveled relative to a middle part of the shelf when the roof is in the lowered position.
- 11. The convertible roof of claim 1, wherein the rear roof part points up with its outer side in the lowered position, further including a second roof part located underneath the shelf with an identical camber to a camber of the rear roof part.
